On This Page

Targeting Description

Get a human-readable descriptions for a set of targeting specs. To read targeting descriptions for specific `ads` make an `HTTP GET` to `https://graph.facebook.com/{AD_ID}/targetingsentencelines`.

Targeting Description for Existing Ads

To get `targetingsentencelines` connection of an existing ad:

The response:

```
{
    "id": "<AD_ID>/targetingsentencelines",
    "targetingsentencelines": [
    {
        "content": "Location - Living In:",
        "children": [
            "Japan",
            "United States"
        ]
    },
    {
        "content": "Age:",
        "children": [
            "20 - 24"
        ]
    },
    {
        "content": "Gender:",
        "children": [
            "Male"
        ]
    }]
}
```

Responses contain these fields:

Name	Description

`targetingsentencelines` type: array of JSON objects	Human-readable description of the targeting spec. Each object contains `content` or targeting type, and `children` or targeting spec. This field only takes effective placements into consideration.

Targeting Description for Ad Accounts

You can also get targeting descriptions a targeting spec with a `HTTP GET` for an ads account at `https://graph.facebook.com/{AD_ACCOUNT_ID}/targetingsentencelines`.

For example, to get targeting descriptions for people who live in the US or Japan and are males between the age of 20-24:

Response:

```
{
    "params": {
        "genders": [1],
        "age_min": 20,
        "age_max": 24,
        "geo_locations": {
            "countries": [
                "US",
                "JP"
            ]
        }
    },
    "targetingsentencelines": [{
        "content": "Location - Living In:",
        "children": [
            "Japan",
            "United States"
        ]
    }, {
        "content": "Age:",
        "children": [
            "20 - 24"
        ]
    }, {
        "content": "Gender:",
        "children": [
            "Male"
        ]
    }]
}
```
